

Cantilever gates can be installed to provide high security to an area or entrance. These counter-balanced gates are available in 4 different specifications to give flexibility on cost and size, covering clear openings up to 25m.

These gates do not require a track across the road.

FEATURES

BENEFITS

4 types available

Gates cover all sizes up to 25m, including areas with restricted run back

Robust

All our gates are manufactured for industrial and commercial applications

Control Panel

Standard control panel used throughout the range of products full programmable to your exact requirements

Safety

All these gates conform to BS EN 12978 and 12453 (cat 3 & 4 of EN954-1)
