

The Bi - fold gate is available in single or double leaf operation and is designed to offer a swift and secure form of entrance control. An effective way to secure any area, this speed gate will operate at approximately 1 metre per second. Conforming to the latest BS EN safety regulations, the equipment sets a new benchmark with all safety features fitted as standard, including buffers and dual height infra-red beams.

FEATURES

BENEFITS

3 phase heavy duty operators

Mounted at high level giving a 100% duty cycle

Speed control

Speed of the gates can be matched to site requirements

Individual drive units

Allows service and maintenance to the gate with no disruption to traffic
