

Tracked sliding gates can be installed to provide high security to an area or entrance.

They are available as single leaf, concertina construction and/or parallelogram allowing installation in almost any application.

## FEATURES

## BENEFITS

Size

Gates cover all sizes up to 60m, including areas with restricted run back

Robust

All our gates are manufactured for industrial and commercial applications

Control Panel

Standard control panel used throughout the range of products fully programmable to your exact requirements

Safety

All these gates conform to BS EN 12978 and 12453 (cat 3 & 4 of EN954-1)

Traffic Control (optional)

Traffic lights can be connected directly onto standard panels to give traffic light operation

Corrosion Resistant

All gates are hot zinc sprayed prior to finishing to give life-long corrosion protection
